

Amina Technologies Ltd is the world's leading supplier of custom, *high-performance* invisible loudspeaker solutions. Using a revolutionary diffuse sound radiator technology, Amina provides extremely high performance invisible loudspeakers for homes and businesses, and offers a solutions-based approach to architects, interior designers, and anyone who wants truly amazing sound without seeing speakers.

The Company and its international representatives offer a complete service including application and system advice, product design, manufacture and installation through an approved network of professional engineers and installers. Amina has provided high performance invisible sound for a large number of private and prestigious locations throughout the world. Some notable projects in the commercial sector are the US Capitol, UK Houses of Parliament, Boca Resorts Hotel, Dolce & Gabbana retail, and more. In addition, Amina is proud to be represented in numerous ultra-high-end homes and in many unique applications ranging from home theaters in the Hamptons, to mega whole-house audio in Dubai, to an outdoor pool home theater near London, and many more.

Amina's design and manufacturing headquarters are located in Huntingdon, Cambridgeshire - the heart of Britain's technology belt for aerospace panel production and electronics & audio design excellence. With innovative skills and technical resources at hand, the Company creates cost effective bespoke solutions with a turnaround time second to none. Additionally, Amina operates North American offices in Cincinnati, Ohio, USA and Toronto, Ontario Canada.
