

Amina Technologies Company Fact Sheet

Who is Amina?	Amina is one of the world's leading designers and manufacturers of custom, invisible loudspeaker solutions that perform at the same or higher level than conventional speakers. Amina have been supplying high quality, room filling sound to the retail, commercial and domestic markets worldwide for over 8 years.												
Why is this important?	Invisible speakers have been around for a long time. Unfortunately, so has the compromise on sound quality that accompanied them. Amina makes it possible to experience high performance sound from an invisible speaker. This presents new opportunities and flexibility for audio installers, architects, interior designers, and more.												
What is Amina's Innovation?	Amina has perfected a method, through extensive research and development, of exciting the surface of a flat panel to create natural sound that radiates evenly in all directions. The loudspeaker panels have been engineered to perform optimally while covered with numerous surface finishes (such as plaster, drywall compound, paint, wallpaper, veneer, and more), without altering the tonal quality of the sound.												
What are the applications for invisible speakers?	Applications exist anywhere that there's a desire for high quality sound without visible speakers. These include luxury homes and condos, premier hotels, high-end retail stores, corporate board rooms, worship facilities, and more.												
How does Amina's technology work?	Amina Invisible loudspeakers consist of a special lightweight, strong composite panel material which is vibrated in the same way as the bodies of natural musical instruments (for example the acoustic guitar, violin or piano). These vibrations recreate a diffuse source of sound energy which is capable of filling a room much more evenly than sound from a conventional loudspeaker.												
What are Amina's Products?	Amina provides a variety of flat speakers, including totally invisible in-wall models, on-wall "picture" speakers that are covered with artwork, professional PA speakers, custom design and application services, and more. <u>Key products are:</u> <i>* AIWX Series Invisible Speakers</i> <i>* ALF40 Compact Hidden Subwoofer</i>												
Who are Amina's Customers?	Amina distributes through a vast network of authorized dealers and distributors. This network is fully trained by Amina in the professional design, application, and installation of the Amina loudspeaker offering.												
Amina Management	Managing Director: Richard Newlove, Director of Sales: Keith Vanderkley (North America), Director of Marketing: David Frey (North America)
