Case Study: Amina's invisible speakers - the obvious solution for a luxury restaurant

Over 20 high resolution images are now available of the installation completed late last year in the highly acclaimed Maes-Yr-Haf restaurant.

This contemporary boutique hotel and restaurant, which is nestled in the Gower Peninsula in South Wales, shows perfectly how Amina's invisible loudspeakers free interior designers from the clutter and intrusion of traditional speakers.

The Maes-Yr-Haf, which had been a shop, Bed & Breakfast, and private residence in the past, took over 3 years at a cost of £500,000 to complete. **The emphasis from the beginning was to be design and quality led and the result is truly satisfying...**

The unique designer restaurant used four Amina AIW3 40 watt speakers when it needed an audio solution that wouldn't intrude. The Plaster In-wall speakers provide high quality ambient room filling sound that seems to evolve seamlessly from the walls.

The images (in both low and high resolution formats) are available to all Amina partners and integrators as a marketing resource. They can be used with prospective clients, reproduced on websites, e-newsletters, printed material and in regional and national advertising when promoting Amina products.

Amina's **NEW** Stud Wall Back Boxes are now available. Please contact Amina for pricing.

If you would like to learn more about the unique Amina Plaster-In-Wall product line, please call **T: +44 (0) 1480 354390** or email inspired@amina.co.uk.
