

Press Release

Amina Introduces Life Fidelity™ Series Invisible Speakers for the Commercial Market

Cincinnati, OH, United States, 05/22/2009 - The new Life Fidelity Commercial Series speaker has been developed with an integral 70/100V transformer for a complete commercial sound solution.

Amina Technologies is pleased to announce the launch of their new Life Fidelity Commercial Series of invisible Plaster In-Ceiling (and wall) loudspeakers. The Amina Life Fidelity Commercial Series are totally invisible full range loudspeakers designed for use in distributed 70/100V audio installations and can be finished with drywall compound, plaster paint, wallpaper, veneer, and more to provide a completely 100% invisible speaker installation.

Like the highly acclaimed AIWX Series of invisible speakers from Amina, the Life Fidelity Commercial Series achieves unprecedented smooth and even HF coverage, without comb-filtering between devices, a feat unobtainable using conventional in-wall or ceiling speakers. With power selection ranging from 5 to 40W, and fitted with a Toroidal transformer, the Life Fidelity speakers provide extraordinary half-sphere dispersion with even frequency response, from 100Hz to 22kHz, delivering 180 degree coverage throughout its complete bandwidth. The extremely low profile allows for installation in very shallow spaces, and a low profile fireproof back box is available as well.

According to Richard Newlove, Managing Director of Amina Technologies Ltd, "The Life Fidelity Commercial Series is specifically designed for use in large commercial installations such as public areas in hotels, hospitals, theaters, airports, and other public buildings where high quality, evenly distributed sound is required but where, aesthetically, the source needs to be totally invisible." He added, "The new Life Fidelity range represents a major breakthrough in allowing interior designers and architects a free hand to sculpt the future of beautiful public buildings while accessing all the audio and communication technology required of modern buildings."

The new Life Fidelity Commercial Loudspeakers are available now in the USA and Canada through Certified Amina Dealers, and worldwide via Amina's authorized distributor network. They will be on display in Booth 5773 at InfoComm 09 in Orlando, FL, June 17-19.

About Amina Technologies

Amina Technologies Ltd (aminatechnologies.com) is the world's leading supplier of completely invisible loudspeaker solutions engineered to provide incredible, invisible sound for luxury homes and high-end commercial spaces. Architects, interior designers, and audio installers can now work together in harmony to design a sound system that results in absolutely no visual interference with the interior design.

Amina's design and manufacturing headquarters are located in Cambridgeshire, UK, the heart of Britain's technology belt for audio design excellence and for aerospace composite panel production. In addition to managing sales and marketing offices in the USA and Canada, Amina distributes throughout Europe and the rest of the world via a network of global distributors.
