

## Press Release

### **Amina Invisible Speakers on Display at EHX Spring 2010**

**Cincinnati, OH, United States, 03/19/2010 – Incredible AIWX Series Speakers and New ALF40 Subwoofer will be showcased.**

Amina Technologies is pleased to be participating in the Spring Electronic House Expo, one of the premier trade shows for the custom electronics industry.

On display will be the AIWX Series Invisible Speakers and the new ALF40 Hidden Subwoofer. The Amina® AIWX Series In-Wall Loudspeakers are the world's first high-performance hidden loudspeakers. Designed to be skimmed over with up to 3/16" of plaster or drywall compound, the AIWXs provide a totally concealed audio solution that allows complete interior design flexibility without the visible presence of speakers.

The compact ALF40 Bass Enhancer is the first subwoofer Amina has designed and engineered specifically to complement the current line of invisible speakers. Amina is teaming up with LK Stockroom ([lkstockroom.com](http://lkstockroom.com)), the official Florida Sales Representative for Amina Technologies, to offer custom installers a chance to experience Amina invisible speaker technology firsthand.

The EHX show ([EHXweb.com](http://EHXweb.com)) is at the Orlando Convention Center in Orlando, Florida, and runs from March 25 through March 27, 2010.

Amina Technologies will be on display at booth # DR1A.

#### About Amina Technologies

Amina Technologies Ltd ([AminaTechnologies.com](http://AminaTechnologies.com)) is the world's leading supplier of completely invisible loudspeaker solutions engineered to provide incredible, invisible sound for luxury homes and high-end commercial spaces. Architects, interior designers, and audio installers can now work together in harmony to design a sound system that results in absolutely no visual interference with the interior design.

Amina's design and manufacturing headquarters are located in Cambridgeshire, UK, the heart of Britain's

technology belt for audio design excellence and for aerospace composite panel production. With offices and warehouse facilities in the UK and North America, Amina distributes throughout Europe and the rest of the world via a network of global distributors.
